

From the Editor

Journal of Applied Research Welcomes a New Editor-in-Chief

William Soliman, PhD, has been appointed as Editor-in-Chief of the Journal, effective with this issue. Dr Soliman has been in the pharmaceutical industry for many years working with a variety of companies, with a specific focus in the medical science liaison arena. His primary area of expertise is cardiovascular disease, where he works with thought leaders in the area of lipidology, cardiology, hypertension, and endocrinology. Will has also worked with a CME organization where oversaw the development of the clinical and scientific strategy for the organization.

Will has also been involved in a diverse array of projects from developing scientific curricula to recently publishing two papers in *Circulation's Cardiovascular Quality & Outcomes*.

Will holds a PhD, MPhil, from Columbia University, an MA from St. Peter's College, and a BA from New York University. His academic background is in Biochemistry and Chemistry Education, as well as having a strong background in biostatistics and clinical trial design.

We welcome Will to the Journal, and look forward to his future contributions.
